

### Site Enhancements

- Since 2015, Niagara Falls Landfill has spent more than \$10M to cap 45 acres of the Landfill, including approximately \$4M in 2017, with an additional \$2.5M planned to cap 10 acres in 2018.
- In 2017, we voluntarily invested approximately \$400K in gas collection and control infrastructure and operations and maintenance, with at least another \$500K planned in 2018.
- We introduced horizontal gas collectors in the active disposal area, and an on-site flare to safely destroy any collected gas.
- Over the past 18 months, we have installed 17 large carbon filters at various points throughout the Landfill to eliminate odor.
- We spent nearly \$200K in 2017 to add pre-treatment to liquids collected from the disposal area to eliminate odor.
- In 2017, we spent approximately \$500K on enhanced intermediate cover to further reduce the potential for odor.
- We have ceased acceptance of paper pulp waste and Niagara Falls wastewater treatment plant sludge.
- The site team conducts daily odor patrols in the community to detect, report and address any potential odors from the Landfill.

### Site Background

- With 33 employees, the active Niagara Falls Landfill has served customers throughout the area since 2000.
- The 377-acre site accepts construction and demolition and non-hazardous industrial-type solid wastes from Erie, Genesee, Niagara, Orleans and Wyoming Counties in New York, neighboring states and Canada.
- The base of the Landfill has a double composite liner constructed between the waste and the natural environment. The liner is thoroughly tested to meet regulations and ensure proper engineering construction standards.
- We support multiple local organizations and causes, including: Carly's Club; Monday Music Mania; Make-a-Wish Foundation; Niagara Business & Professionals Association; Niagara Junior Purple Eagles; Ronald McDonald House; and St. Luke's Mission.
- Niagara Falls Landfill is located in a semi-industrial area with a number of additional potential odor sources within 2 miles of the Landfill.
